

Contact List Application User Guide

Contact List Application helps to maintain Addresses, Phones and important dates of contacts. The flowing actions can be achieved through Contact Display Window which has all below details of the contacts:

- First, Middle, and Last name
- Address List – must accommodate a variable number of addresses, each of which should contain the following:
 - Type of address (e.g. home, work, other, etc.)
 - Street Address
 - City
 - State
 - Zip code (i.e. postal code)
- Phone Number List - must accommodate a variable number of phone numbers, each of which should contain the following:
 - Type of number (e.g. home, work, fax, etc.)
 - Number with Area Code (3-digits)
- Date List – must accommodate a variable number of dates, each of which should contain the following:
 - Type of date (e.g. birthday, anniversary, etc.)
 - Calendar date
- An option to add, edit or delete an entry from the Contact Display Window.

Contact List Application

Below are the functions available in contact list application:

1.Global Search Contacts – (search for a contact, given any combination of Name components, Address component(s), Phone number components.)

2. Add New Contact – (New Contact Entry form to add entry of all data, including the ability to add a new Addresss, new Phone number, or new Date to the respective lists.)

3. Edit existing Contact – (Modify Contact Entry)

4. View a Contact – (View all contact details)

Search Contacts:

In the global search box on the GUI enter any contact details (contact name/address/date/phone number) and results on the page are automatically updated below. Select the required contact by clicking on the required contact from filtered contacts. The details page of selected contact is displayed.

View Contact:

To view any Contact Information, click on the contact from the contacts List. This can be done either from the search results or scrolling all contacts.

Add New Contact:

Click on 'Add New Contact' button to create a new contact. New Contact Entry form will be displayed where user can fill in details for contact name, phone number, address and any important date like birthday. After filling the required details click on Save Contact button to save contact details to database.

Edit Contact(Modify/Delete):

Select the contact you want to edit by using global search. Click on Edit button on the contact details page to edit contact details or to add new fields to the contact. Use update button to update details. User can delete contact or contact details by clicking on corresponding delete button on Contact details page.
